

Dear Timberscan Mobile customer,

For over three years now, Core Associates and hh2 Cloud Services have cooperated in a strategic alliance to bring you Timberscan Mobile. This brought you the benefits of using TimberScan in the cloud, using a web interface and native apps for both iOS and Android.

Core Associates and hh2 Cloud Services are very different companies and have different perspectives on what kind of products and services they offer, and how they offer them. This has led to irreconcilable differences in the vision of Timberscan Mobile and how it will be maintained and developed in the future.

Effective June 1, 2019, Core Associates and hh2 Cloud Services will be terminating their strategic relationship, and Timberscan Mobile will be permanently shut down.

We apologize for any inconvenience this might cause.

However, as a current Timberscan Mobile customer, you are not without options. Both Core Associates and hh2 Cloud Services will have a migration path available so that you can continue to access your invoices remotely and code and approve them using your mobile devices.

We recommend that you evaluate your options and choose the path that is best for your company.

Both Core Associates and hh2 Cloud Services may be in touch shortly for further information.

We remain committed to serving your needs and thank you for your business.

Sincerely,

Frank Greci
CEO, Core Associates

Devon Dorrity
CEO, hh2 Cloud Services
